

Hello

# I'm Rinal Trehan

UI/UX Designer with startup and enterprise experience creating elegant and engaging, functional interfaces. I specialize in product design for the web and mobile devices. I have experience with many roles and products in the technology field.

I have a broad range of experience creating designs for consumer and enterprise level interfaces. My abilities span multiple platforms, the web and mobile app design in both iOS and Android platforms.

## EXPERIENCE

### iOS Senior UI/UX Designer - 06/2016 - Present

Pennsylvania Department of Transportation, Harrisburg, Pa

- Joined iOS specialist mobile team to own and lead UI/UX, interaction design, and usability across all iOS apps.
- As the UI/UX designer, I had the overall responsibility for following applications ePayroll, Concrete Book, Sample ID, QA Evals and VSIR apps to ensure to follow Human Interface Guidelines. Collaborated with the mobile architect to establish consistency across all apps and defined best practices and techniques.
- Created wireframes, hi-fi mockups and prototypes, outlining the user flow and interactions for all new apps.
- Worked tight with development team and project managers to ensure requirements and UI asset production timetable are met, while ensuring best-in-class product UX and design.
- Participated in the development process from definition through design, build, test, release and maintenance of the app.
- Created design that's top of the latest standards, project resources to ensure business continuity. Stayed abreast of UX trends and looked for creative ideas and inspiration in parallel analogous worlds.
- Performed tasks efficiently and worked together with the team to ensure project success.
- Proud to be a part of an award winning mobile team who developed apps that saves Pennsylvania state \$28 million a year.
- Technologies: Sketch, Invision and Adobe Creative Suite
